

SKID

RESCUE STRETCHER KIT

RS00WP

The ZERO® Skid is a lightweight, non-flammable, rescue stretcher specially designed for use in confined spaces with limited access including rescue at height, helicopter & military operations and water rescue.

Compact for transport and storage, the stretcher can be rolled to fit into a backpack. When assembled, the stretcher has rigid strength that gives excellent support to the casualty. The sleds shape helps the stretcher to slide over any rough terrain and flexible to fit all body shapes and sizes.

MAX. LOAD: 500kg

LIFESPAN: Up to 10 Years

MODEL	SIZE	WEIGHT (G)	DIMENSIONS	MATERIAL	RATING (KG)
